

SPIN

An Industrial-strength piece of table-top engineering designed to act as a kinetic centerpiece and produce Infinite arrangements.

Designed with a series of counterbalanced arms that allow for different positions on all types of table top, Spin is an exercise in solidity, movement and adaptability. Able to hold tea lights and taper candles with equal elegance, the cast iron contraption takes cues from the heavyweight cantilever mechanisms of dockside cranes and the mechanical elegance of 1950s mobiles.

Made in Great Britain, Spin's heavy cast iron structure is powder coated black. Engineered to operate with restrained motion, the system relies on cast ball bearings which allow for measured mobility and an ever changing instantly recognizable silhouette.

Notes to editors

About Tom Dixon

Established in 2002, Tom Dixon is a British product design brand. With a commitment to innovation and a mission to revive the British furniture industry, the brand is inspired by the nation's unique heritage and produces extraordinary objects for everyday use.
